

INTUICELL

HEAD OF IP

Lund, Sweden

Spun out from Lund University in 2020, IntuiCell is preparing to revolutionise the way we think about artificial intelligence. This pioneering company is on a mission to build AI that learns like the human brain - adaptive, efficient, and instinctive - and unlock a new generation of intelligent machines. This emerging technology will act as the infrastructure for future innovators, opening the door to countless applications with global impact.

As the team continues to grow, there is an exciting opportunity for a Head of IP to take ownership of the function, shape the company's growing portfolio, and ensure IntuiCell's groundbreaking innovations are protected and positioned for global impact. This is an opportunity to:

Build and shape IP strategy within a world-first technology: Join IntuiCell at the ground floor of a career-defining opportunity and take full ownership of the IP function, establishing the IP framework that will underpin a revolutionary AI platform and its future applications.

Influence across the business: Work closely with world-class experts, embedding IP strategy at the heart of a fast-moving startup. You will anticipate challenges, guide colleagues at all levels, and foster an IP-aware culture, ensuring the portfolio protects IntuiCell's groundbreaking innovations and supports its mission.

Join a team changing the face of artificial intelligence: IntuiCell is not in the business to make iterations - they are here to enact a paradigm shift: they are not just tweaking the engine - they are redesigning the vehicle from scratch. Contribute to a technology that will serve as a launchpad for countless new applications, and play a role in shaping innovations whose impact could be felt for generations.

IntuiCell are seeking an experienced Patent Attorney for this role; you should feel at home handling both substantive and long term IP strategy within a dynamic industrial environment. You may possess a background in Physics, Maths, Computer Science, Computational Neuroscience, or related fields. Most of all, you are passionate about the work of IntuiCell to redefine artificial intelligence. To disrupt the way we think about AI, get in touch today!
