

JOIN AN INDUSTRY-LEADING GLOBAL TECH COMPANY

EUROPEAN PATENT ATTORNEY

VELDHOVEN, THE NETHERLANDS

ASML

A PIONEERING COMPANY

ASML are world-leading technology experts. They are true innovators - designing and manufacturing semiconductor technology to make living more advanced and efficient for people across the globe. ASML provide technology for all of the world's top chip companies, chips that are implemented into a wide variety of different industries from satellites to medical devices.

A COLLABORATIVE CULTURE

Since their inception in 1984, ASML have been unstoppable. They have defined themselves as industry leaders, creating innovative technology. Underpinning their success is their people. ASML foster a unique culture of support, teamwork and care, where each and every member of their team is appreciated. Through teamwork, they have achieved solutions to complex problems and unlocked the key to superior solutions. Integral to the success of ASML is the patent team, which has been established for many years, and which is highly respected among the stakeholders. You will be welcomed into a team of experts with a revered reputation across the company. The team, comprising of patent attorneys at various stages of full qualification, holds a wealth of experience and truly value the importance of IP.

A CHANCE TO JOIN THE TEAM

This is your chance to be a part of this unique team. ASML are looking for a European Patent Attorney to bring a wealth of technological knowledge from the field of physics, mechatronics or similar. You will have a strong foundation in drafting and prosecution activities. It would also be advantageous if you have international experience due to the global nature of the work ASML do. Your experience may come from private practice or industry but regardless, your passion and dedication will be intrinsic. In return, you will be afforded opportunities of responsibility and growth.

This is an opportunity to support groundbreaking technology innovation for the industry leaders, ASML.
